CARD THANKS—\$1.00 if not over 10 lines. Additional lines 10c per line.  
OBITUARY NOTICES—50c per inch minimum charge \$1.00.

## ALL-AMERICAN THINKING

In spite of the temptations of the campaign, Calvin Coolidge cannot forget that he is President of the United States. He, at least, is not engaged in trying to conciliate this class or that at the almost inevitable expense of setting one class against the other. He will not look at America as a political patchwork torn into pieces to make a party flag. The Philadelphia address is a piece of American thinking—all-American thinking—founded on a ripe consideration of American history, which illuminates and fortifies American institutions and principles and binds Americans in a common national purpose.

Without partisan feeling or rhetoric, Mr. Coolidge has presented his American thought on the current proposals for beginning to abandon the American system of individual initiative and private enterprise. Quietly, with no more emphasis than his earnestness conveys, he sets for the Socialist device of nationalization for what in actual practice it would be—namely the establishment of a huge bureaucracy, the management of our affairs by government officials and job holders, and therewith the final and unescapable imposition upon us all, farmer, wage earner, clerk, or millionaire, of a huge burden of taxes, direct and indirect.

"When we recall," says Mr. Coolidge, "the appalling loss and the difficulties in the management of \$3,500,000,000 worth of ships, we should undoubtedly hesitate about taking on ten times that value in public utilities."

But more telling still is his treatment of the crux of the nationalization policy, the question of control. "With railways and electrical utilities under political control, the domination of a group would be so firmly entrenched in the whole direction of our government that the privilege of citizenship for the rest of the people would consist largely in the payment of taxes"—Chicago Tribune.

## Did You Ever Stop to Think

By E. R. Waite, Secretary, Shawnee, Okla., Board of Commerce

THAT in every city in the land advertisements are helping make business better.

THAT business concerns that wish to sell their wares can simplify their selling by using newspaper advertising.

THAT business concerns are doing business under self-imposed difficulties when they do not use newspaper advertising.

THAT citizens should realize that when they buy advertised goods they get the "best at the price." What to buy will not trouble them after they read the advertisements, for the best is always advertised.

THAT it is with a feeling of pride that live business concerns present for the public's consideration, through their advertisements, the best and latest in up-to-date merchandise, or service.

THAT ads always tell you when to get it, when you want it. All real bargains are advertised.

THAT the best way to make the home city better is for every citizen to buy the right merchandise, at the right place. The right place is the stores of the home city.

THAT no city can have prosperity if the people and business men do not patronize each other.

THAT merchants should never buy in other cities what can be bought at home. They have no more right to do that than any other citizen.

TO BUILD A CITY, citizens must patronize each other; keeping business at home where it belongs. When that is done money will circulate more freely. There will be more work, more improvements and a better and happier city.

## English Nurses Wish To Serve Lepers

LONDON, Oct. 25 (AP)—Appl-

ication by two young professional

women for opportunity to enlist

through the Dominican Priory, at

Hamstead, as nurses to lepers

draws attention to the fact that

English women have never hesitat-

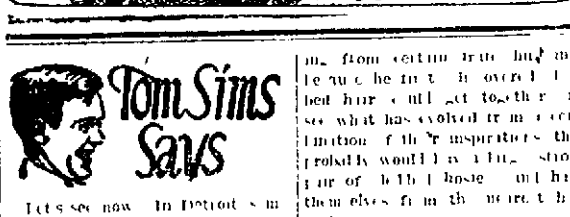

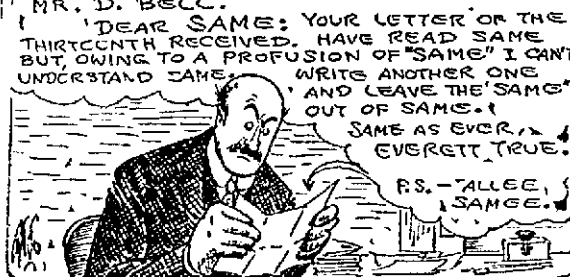

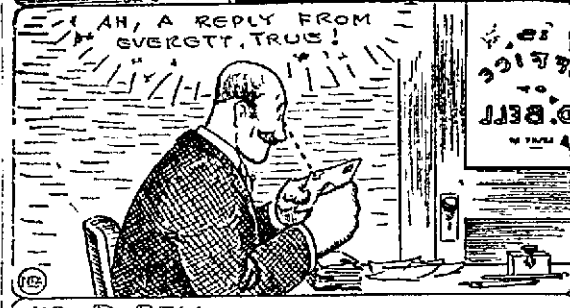

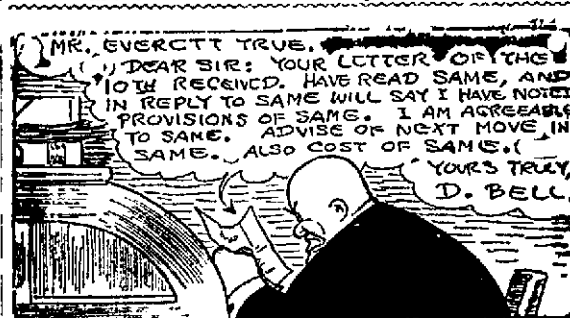

ed to make the sacrifice which this

particular form of service entails.

The superiors of the London headquarters of the Franciscan Missionaries of Mary states that when the mother-general appealed some years ago for six nuns to nurse lepers, more than 1,000 volunteers, all members of the order, responded.

It is an extraordinary fact attributed by the devout sisters to the special care of Divine Providence, that not one of their order had ever contracted leprosy.

## GERMANY HAD FEW SUMMER TOURISTS

Visitors From America, Who Flocked to Olympic Games Did Not See Germany

HAMBURG, Oct. 2 (AP)—European tourist agencies, hotel keepers, railway and steamship officials are now busy trying to make an estimate of next year's possible tourist business from the United States.

The season now ending to a close has been a record breaker, especially for England, France and Italy. Switzerland had a record year and Austria and Czechoslovakia did well. Poland and Holland also prospered and together with Switzerland won the approval of visitors through their wayward, capricious regulations and general uncooperativeness to travelers.

Germany had a poor year and even hot keepers are much disappointed that the visitors from America who flocked to the Weimar Exposition and the Olympic games did not extend their trip into Germany. This was due in part to the most condition of the transportation system of Germany and to the high prices the municipalities imposed on foreign tourists, and the difficulties which foreign travelers had to overcome in the matter of currency exchange and the lack of a common policy of the various states.

On the whole, while Europe had a bumper tourist season this year, it is doubtful whether next year will be as good. Many of the visitors who visited Italy and southern France, especially in the spring and early summer, found hotels and pensions crowded with German visitors. This created a feeling of uneasiness in the United States, and many Americans were puzzled by the apparent prosperity of Germans living in comfort abroad, when many of their fellow countrymen were reported to be in dire want.

Travel in Germany should be more normal next year, provided it is not much in the execution of the Dawes plan. High prices in Germany, especially in the tourist cities, still handicap the tourist. This is not true of the industrial cities, where the cost of living is lower. But the high cost of the tourist cities, which was imposed on the tourist, was finally eliminated. The rooms occupied by tourists are still high, but visitors complain that the food is still cheap. On the whole, while Europe had a bumper tourist season this year, it is doubtful whether next year will be as good.
